Installation of A “BRAND NEW” Turf Field & LED Lighting

For Immediate Press Release

Aberdeen, NJ November 7, 2017

Tab Ramos Sports Center is excited to announce that a brand-new state of the art field turf will be installed between November 24th through November 30th by Shaw Sports Turf. We are very excited about the state of the art turf and with the added technology that Shaw Sports Turf brings, we will now be one step ahead of our competition. Shaw Sports Turf’s Legion fiber system uses the same concept by combining slit film and monofilament fibers into one complete system. Legion not only looks like natural grass and allows for better ball roll, but it also has added durability and infill control. It features our two-ends-per-needle manufacturing process, which results in the most uniform field with no streaks and a predictable playing surface.

Along with the turf install our entire complex lightning will be updated to a state of the art LED lightning system. That will make an immediate impact for all sports leagues, especially the turf side. The large netting that covers the turf ceiling will now be removed which will now increase the lighting by almost 40%!

During the turf installation all games and rentals will be rescheduled to a later date, director Pat Sellitto will be in touch with all soccer captains to inform them of the reschedule. For updates and pictures of the progress please follow us on Facebook.
